

URBAN
COMPANY

PRODUCT TEARDOWN ↗

Presented By:
Team ELIXIR

“Increase **cross-category bookings**
to **maximize** Customer Lifetime Value (**LTV**)”

Presented To:
Team BEYONDTECH

COMPANY OVERVIEW

Annual Revenue (FY'25)
1144.5Cr (+38.2% YoY)

Key service categories

Salon · Home Cleaning ·
Appliance Repair · Pest Control ·
Beauty

USP:
UC controls pricing, training, and
delivery — making cross-sell a
platform decision

HOW IT WORKS?

REVENUE STREAMS

- 1. Take Rate**
8–20% commission per booking
- 2. UC Plus**
Subscription for priority access
- 3. Consumables**
Products sold during service

THE OPPORTUNITY GAP

5M+
Customers

50k+
Professionals

4.8★
Avg. Rating

The Behavioural Reality

Users mentally tag UC as "my salon app" or "my cleaning app" — not a home services platform
Cross-category **awareness is low** — most users don't scroll beyond their first-booked vertical

Re-discovery **only happens when a new need arises**, never proactively

Gap Callout

1 in 5 users books a second category
Not a trust problem. Not a product problem.

A discovery and habit problem

What does the users say

"I saw many options but not really aware which one would go well"
— Reddit user, r/India

USER RESEARCH: TRUST EXISTS, ADOPTION DOESN'T

8 In-depth Interviews

30+ Survey Responses

Users Across
Metro, Tier-1 & Tier-2
Cities

I use Urban Company for salon services.
For plumbing, I just ask my neighbor for a contact.
It never occurred to me to check Urban Company.

CORE INSIGHT

73%

users book from only one category despite awareness of multiple services

4.2x

higher LTV for users booking across 3+ categories compared

68%

users ignore or fail to explore services outside their usual category

WHAT DOES THE INTERNET SAY?

"I saw many options but not really aware which one would go well"

— Reddit, r/India

"Be careful when booking AC services via Urban Company"

— Reddit, r/India

"UC folks are more professional — but for waxing, Yes Madam is good and cheaper"

— Reddit, r/India

CURRENT USER JOURNEY FLAWS:

1. Need Arises

2. Search Specific Service

3. Book Service

4. Need Solved

5. Leave App

User Persona 1

“I trust Urban Company for salon services, but I don’t automatically think of it for everything else.”

— Tara Sitara

AGE	26
OCCUPATION	Frontend Engineer
LOCATION	Bangalore
INCOME	₹12 LPA
EDUCATION	B.Tech, Computer Science
HOBBIES	Reading, cooking, traveling
MARITAL STATUS	In a relationship, Living with Flatmates

Personal Traits

Routine Driven

Ambitious

Organised

Tech Savy

Value Aware

BEHAVIOR

- Uses UC primarily for **salon** & **deep-cleaning** services
- **Compares prices** across **competitors** before booking
- Comfortable using subscriptions if **clear value** exists
- Uses services **reactively** when a **need** arises
- **Rarely explores** categories outside her **existing** booking history
- Associates **different** household **needs** with **different providers**

EXPECTATIONS FROM URBAN COMPANY

- **Personalized recommendations** based on past bookings
- **Strong trust signals** before trying new categories
- **Bundled offers** across complementary services
- Low-risk **first-time trials** for new categories

GOALS & MOTIVATIONS

- Get **reliable services** without spending time
- Avoid dealing with **unverified local providers**
- **Minimize** household maintenance **effort**
- Access **trusted** professionals quickly

PAIN POINTS

- **Hidden charges** reduce trust in pricing
- Perceives **some categories** (AC installation, repairs) as **overpriced**
- Lacks **confidence** that service quality will **remain consistent** across categories

User Persona 2

I trust my personal guy completely. An app can't give me that confidence.
-Shreyaansh Mehta

AGE	22
OCCUPATION	Product Manager
LOCATION	Gurgaon

EDUCATION	MBA
HOBBIES	Plays Cricket
MARITAL STATUS	Unmarried

Personal Traits

Status Aware

Comfort Seeking

Traditional

Loyal

Routine Driven

BEHAVIOR

- **Frequently books** cleaning, repairs, appliance servicing, and wellness services
- **Comfortable trying new** categories if recommended
- Sees **Urban Company as a household-services** platform rather than a single-service app
- **Relies** heavily on **reviews** and **previous positive experiences**

EXPECTATIONS FROM URBAN COMPANY

- Continuity with **trusted professionals**
- **Personalized** household maintenance **recommendations**
- Integrated service **bundles**
- **Loyalty rewards** for multi-category usage
- **Predictive reminders** for recurring household needs

GOALS & MOTIVATIONS

- Get **reliable services** without spending time
- Avoid dealing with **unverified local providers**
- **Minimize** household maintenance **effort**
- Access **trusted** professionals quickly

PAIN POINTS

- Difficulty **rebooking** preferred professionals
- **Inconsistent** availability in **peak periods**
- **Limited visibility** into **preventive maintenance** opportunities
- Occasionally **struggles to compare service packages**

“Why would I book online when my guy comes home anyway? Apps are for when you don't have contacts”

COMPETTITOR ANALYSIS

Urban Company leads in brand trust & service quality but cross-category adoption & pricing competitiveness remain key gaps

COMPETTORS				
NAME	PRONTO	SNABBIT	HOUSEJOY	LOCAL PROVIDERS
PRESENCE	Delhi NCR, Mumbai, Bangalore, Hyderabad	Bangalore, Delhi NCR, Mumbai, Pune, Hyderabad	30+ Cities	Pan India
CATEGORIES	15+ (Cleaning, Pest Control, Appliance, Plumbing, Carpentry)	10+ (Primary: Cleaning & Household Services)	40+ (Repairs, Cleaning, Packers & Movers, Appliances)	All categories
STRENGTHS	Strong in deep cleaning, premium positioning in select categories	Affordable pricing, fast service, strong for cleaning category	Wide service coverage, competitive pricing	Low cost, flexible, relationship-driven trust

WHAT DOES THIS TELL US?

Urban Company is the most trusted platform in the room — but trust alone isn't winning the cross-category battle.

UC BOOKING FLOW ANALYSIS

Analyzing where opportunities for cross-category discovery are lost during the booking journey.

Multiple service categories are visible upfront.

Generic homepage; lacks personal recommendations

Clear category hierarchy enables quick navigation.

Focus shifts entirely to one category.

Ratings, reviews and pricing build trust.

No complementary service recommendations.

Package bundles increase category spend.

Bundles stay within the same category.

Easy cart review and membership visibility.

Cross-sell appears too late and lacks personalization.

Fast, flexible scheduling experience.

High-intent moment isn't used for cross-sell.

Transparent pricing and smooth checkout.

KEY STRATEGIC INSIGHT

Urban Company has optimized the booking funnel for transaction completion, but not for cross-category discovery. By the time complementary services are introduced, user intent is already fixed—resulting in missed opportunities to expand engagement and increase lifetime value.

UC HOMECARE OS -UI/UX REDESIGN

From Reactive Service Booking to Proactive Home Management

AI-Led Discovery
Natural conversation replaces manual service search

Occasion Based Bundles
Smart bundles for seasonal and related home needs.

Unified Home Dashboard
One place to monitor your home's health and maintenance.

Higher Cross-Category Bookings

Higher Repeat Engagement

Higher Customer Lifetime Value

SUCCESS METRICS

Measuring the impact of HomeCare OS

North Star Metric

Average Services Booked per Household

Measures how effectively HomeCare OS increases cross-category service adoption and long-term customer engagement

L1 Metrics

- **Cross-Category Booking Rate**

Percentage of bookings that include services from multiple categories.

- **Monthly Active Households (MAH)**

Number of households actively using HomeCare OS each month.

- **Repeat Booking Rate**

Percentage of customers making another booking within 90 days.

L2 Metrics

- **AI Assistant Adoption**

% of users interacting with AI before booking.

- **Recommendation Conversion Rate**

% of AI recommendations converted into bookings.

- **Bundle Attachment Rate**

% of bookings containing recommended bundles or add-on services.

L3 Metrics

- **Customer Lifetime Value (LTV)**

Revenue generated per customer over their lifetime.

- **Home Health Score Improvement**

Average improvement in household maintenance score over time.

- **Customer Satisfaction (CSAT)**

User satisfaction after AI-assisted booking and completed service.
